Johnpeter Rayappan

Lead Software Engineer • Staff-Level Full Stack Engineering • Frontend Architecture • Scalable APIs

United States | johnpeter.r.us@gmail.com | +1(646)-233-6559 | www.linkedin.com/in/johnpeter-rayappan

Professional Summary

Lead Software Engineer with 12+ years delivering high-performance full-stack applications across e-commerce, enterprise platforms, and real-time data systems. I specialize in building user-facing products end to end, from frontend architecture and responsive interfaces to scalable APIs, distributed services, and reliable data flows. I operate at the intersection of hands-on engineering, system design, and team leadership, aligning product, design, QA, and operations to ship maintainable software with predictable delivery. My core strengths include React, Angular, Vue, Svelte, Node.js, GraphQL, PostgreSQL, Redis, CI/CD automation, containerized delivery, and performance optimization, with cloud and AI-assisted engineering experience that supports faster execution and stronger software quality.

Areas of Expertise

Frontend Engineering: React, Angular, Vue.js, Next.js, Svelte, TypeScript, NgRx, Redux, Contentful, AEM, HTML5, CSS3
Backend & API Engineering: Node.js, GraphQL, Go, Express.js, NestJS, TSOA, Spring Boot, FastAPI, Python, REST APIs, Microservices, WebSockets
Full Stack Delivery: System Design, Frontend Architecture, API Design, Performance Optimization, Microservices, Reusable Component Design, Cross-Functional Leadership
Cloud & Delivery: Azure, AWS, Cloudflare, Docker, CI/CD, GitHub, GitLab, Bitbucket
AI-Assisted Engineering: GitHub Copilot, GitLab Duo, Elliot, Rovo
Data & Integration: PostgreSQL, MongoDB, MySQL, SQL, Redis, GraphQL, HTTP, REST, OAuth 2.0, OpenID, XML
Delivery Practices: Agile/Scrum, SDLC, Release Management, Automated Testing, Jira, Confluence, Git, SVN

Experience

Lead Engineer

Dec 2024 - Present

Capgemini America Inc | Atlanta

- Lead cross-functional engineers in delivering customer-facing web experiences and high-throughput APIs for large-scale digital commerce initiatives
- Own end-to-end execution across product, design, QA, and operations, turning evolving business requirements into release-ready solutions
- Elevate engineering throughput by strengthening CI/CD, containerized build workflows, and automated testing practices
- Improve performance, maintainability, and data consistency across frontend applications and distributed backend services
- Deliver real-time dashboards and reliable system integrations that increase operational visibility and support faster decisions

Key Achievements

- Established stronger release and delivery practices across cross-functional teams
- Improved engineering efficiency through automation, containerized workflows, and stronger test coverage
- Increased alignment across engineering, product, QA, and operations for more predictable execution
- Strengthened the foundation for scalable digital commerce delivery across shared platform capabilities

Lead Software Engineer

Sep 2022 - Dec 2024

Photon Infotech Inc | Atlanta

- Combined hands-on full-stack development with technical leadership across enterprise and e-commerce product teams
- Aligned product, design, QA, and operations stakeholders around roadmap priorities, execution plans, and release readiness
- Represented release scope, timelines, dependencies, and risks in stakeholder reviews and cross-functional planning forums
- Drove SDLC and release management improvements that increased delivery predictability, quality, and team effectiveness
- Built real-time visualization dashboards and standardized data flows that improved consistency across applications
- Led performance optimization efforts for long-running applications to improve responsiveness and production stability

Key Achievements

- Served as a hands-on technical lead while coordinating cross-functional delivery
- Improved release discipline and software quality through SDLC and execution process improvements
- Helped teams deliver complex roadmap items with better predictability and stakeholder visibility
- Elevated application consistency and user experience through dashboard and data-flow improvements

Senior Software Engineer

Sep 2018 - Sep 2022

Photon Interactive Pvt Ltd | Chennai

- Delivered end-to-end features for e-commerce and real-time visualization platforms with strong performance and reliability expectations
- Designed and maintained scalable APIs for data-intensive applications with demanding throughput requirements
- Optimized database access patterns and application data flows to improve reliability, throughput, and user experience
- Introduced automated testing and CI practices that improved deployment consistency and reduced production risk
- Built responsive dashboards and reusable frontend components that accelerated delivery across platforms
- Mentored junior engineers and led design reviews that improved implementation quality and team consistency

Key Achievements

- Expanded ownership from feature delivery into API design, performance tuning, and engineering quality improvements

- Contributed to scalable product experiences across e-commerce and real-time analytics domains
- Improved reliability and deployment confidence through stronger testing and CI practices
- Raised team quality standards through mentoring and design review leadership

Senior Software Engineer

Jan 2017 - Sep 2018

TPF Software India Pvt Ltd | Chennai

- Led full-stack delivery for mission-critical products after promotion to Senior Engineer based on technical ownership and delivery impact
- Built a real-time flight-status dashboard that gave airport and airline teams stronger operational visibility
- Developed reusable frontend architecture that reduced bundle size by 40% and improved page load times by 25%
- Led project teams integrating authentication, backend frameworks, and IoT-connected systems into production workflows
- Raised engineering standards through testing and code-quality practices that improved maintainability and reduced defects

Key Achievements

- Promoted to Senior Engineer based on technical ownership and delivery impact
- Reduced frontend bundle size by 40% and improved page load times by 25% through reusable component architecture
- Delivered operationally critical dashboard capabilities for airport and airline users
- Led integrations across backend services, authentication, and connected systems in production environments

Software Engineer

Sep 2014 - Dec 2016

Ardhika Software Technologies Pvt Ltd | Chennai

- Built full-stack applications for fintech and restaurant technology platforms early in career progression
- Delivered production features for SIPBazaar and Linga POS, improving order workflows and day-to-day user operations
- Designed order customization, bill-splitting, and large-data access optimizations for performance-sensitive use cases
- Contributed to R&D and utility applications that supported product experimentation and internal efficiency
- Worked with cross-functional teams to ship stable user-facing features and improve application reliability

Key Achievements

- Built a strong foundation in end-to-end web application development across multiple business domains
- Delivered production functionality for fintech and restaurant platforms early in career progression
- Built performance-sensitive features supporting order management and customization workflows
- Earned early ownership on production features across multiple client-facing applications

Projects

Inspire Brands(IDP)

Capgemini America Inc | Atlanta

- Contributed to a large-scale white-label digital commerce platform supporting multiple restaurant brands.
- Strengthened shared frontend and backend capabilities used across brand experiences.
- Improved brand-onboarding workflows and reusable platform foundations for faster rollout of digital features.
- Supported scalable delivery for customer-facing commerce experiences across a multi-brand ecosystem.

Discount/American Tires

Capgemini America Inc | Atlanta

- Delivered e-commerce and inventory features for a high-traffic retail platform.
- Improved product discovery, order-flow reliability, and checkout experience across core shopping journeys.
- Strengthened identity integration and backend coordination for more dependable transaction execution.
- Helped improve inventory visibility and overall customer purchase flow reliability.

UnderArmour

Photon Interactive Pvt Ltd | Chennai

- Built full-stack capabilities for digital commerce and connected fitness experiences.
- Delivered customer-facing features that supported engagement, commerce workflows, and scalable integrations.
- Contributed to platform functionality serving large-scale digital experiences across international markets.
- Helped strengthen product experiences for a globally recognized consumer brand.

VT Support

Photon Interactive Pvt Ltd | Chennai

- Built responsive real-time visualization dashboards for drilling operations.
- Enabled live analysis, collaboration, and alerting for operational teams working with time-sensitive data.
- Improved visibility into critical drilling insights through interactive charts and responsive layouts.
- Delivered a cross-device experience that supported desktop, tablet, and mobile usage.

Samsung Global

Photon Interactive Pvt Ltd | Chennai

- Developed e-commerce platform features for a global consumer brand.
- Supported product management, customer ordering, payments, and promotional engagement workflows.
- Helped deliver reliable shopping flows and administrative capabilities for day-to-day business operations.
- Contributed to a stronger customer experience across core commerce interactions.

Rapid Turnaround

TPF Software India Pvt Ltd | Chennai

- Built operational software for airport duty managers and airline teams.
- Delivered a real-time view of turnaround activities to improve transparency and coordination.
- Helped stakeholders identify delays earlier and respond with better situational awareness.
- Supported more efficient ground operations through clearer workflow visibility.

Insteract

TPF Software India Pvt Ltd | Bengaluru

- Delivered features for a corporate travel management platform.
- Helped align traveler choices with company policy and benchmarked market options more effectively.
- Improved how travel options, policy controls, and user workflows were surfaced in the product.
- Supported smarter decision-making and easier administration for business users.

Linga POS

Ardhika Software Technologies | Chennai

- Built online ordering and POS integration capabilities for restaurant operators.
- Enabled menu publishing, store-data synchronization, and direct order routing into kitchen workflows.
- Improved continuity between online ordering and in-store systems for smoother operations.
- Helped restaurants manage menu accuracy, order processing, and fulfillment more efficiently.

Technical Proficiencies

Frontend: React, TypeScript, Next.js, Angular, Vue.js, Svelte, Redux, NgRx, Vuex, SvelteKit, Stencil, Solid.js, HTML5, CSS3, SCSS, Sass, Contentful, AEM
Backend & APIs: Node.js, Express.js, NestJS, GraphQL, REST APIs, OpenAPI, Swagger, TSOA, Go, Spring Boot, FastAPI, Python, WebSockets, Microservices
Full Stack Leadership: System Design, Frontend Architecture, API Design, Performance Optimization, Cross-Functional Delivery, Technical Mentoring, Technical Design Reviews
Data & Caching: MongoDB, PostgreSQL, SQL, MySQL, Redis, ORM
Cloud, DevOps & Delivery: AWS, Azure, Cloudflare, Docker, CI/CD, Containerized Delivery, Deployment Automation, GitHub, GitLab, Bitbucket
AI-Assisted Engineering: GitHub Copilot, GitLab Duo, Elliot, Rovo, Agentic AI, AI-Assisted Development Workflow Automation
Protocols & Security: HTTP, REST, OAuth 2.0, OpenID Connect, JWT, GraphQL
Mobile: React Native, SwiftUI
Engineering Practices: Agile/Scrum, SDLC, Jira, Confluence, Automated Testing, Release Management, Mentoring, Cross-Functional Collaboration

Education

B.E. - Computer Science Engineering

Anna University | India

- Concentrated coursework in algorithms, data structures, operating systems, database systems, computer networks, and software engineering with strong programming and system design foundations.

Languages

English, Tamil
