JOHNPETER RAYAPPAN

LEAD SOFTWARE ENGINEER

United States | johnpeter.r.us@gmail.com | +1(646)-233-6559 | LinkedIn

PROFILE

Lead Software Engineer with 12+ years designing and delivering web and backend systems while leading and mentoring cross-functional teams. I turn ambiguous problems into reliable products from real-time visualization dashboards to high-throughput APIs, prioritizing performance, maintainability, and clear communication. I drive SDLC maturity and implement CI/CD pipelines, release automation, containerized builds, and automated testing to accelerate release cadence, reduce manual effort, and improve quality. My technical toolkit includes React, Angular, Vue, Svelte, Node.js, GraphQL, PostgreSQL, Redis, Docker, Git, AWS and Azure I'm actively prototyping agentic AI for safe tool orchestration.

AREAS OF EXPERTISE

Frontend Programming: React, Angular, Vue JS, Next JS, Svelte, NgRx, Redux, CMS, Contentful, AEM, HTML5, CSS3

Cloud Tech: Azure, AWS, Cloudflare

Protocols: HTTP, REST, OAUTH2.0, OpenID, XML

Databases: PostgreSQL, MongoDB, SQL, MySQL

DevOps: Docker, CI/CD, GitLab, GitHub, BitBucket

Backend Programming: NodeJS, GraphQL, GoLang, Express JS, Nest JS, TSOA, Spring Boot, FastAPI, Python, Microservices, Web Socket

Agentic AI: GitHub Copilot, GitLab Duo, Eliot, Rovo

SCM: Git, SVN

Caching: Redis

Test: Jest

EXPERIENCE

Lead Engineer, Capgemini America Inc — **Dec 2024 to Present**

Atlanta

- Led a cross-functional engineering team delivering high-throughput APIs and responsive frontend experiences
- Partnered with product and design to define requirements and with QA and operations to ensure release readiness
- Implemented CI/CD, containerized builds, and automated testing to accelerate release cadence and reduce defects
- Championed performance and maintainability improvements
- Delivered real-time dashboards and consistent data flows across distributed systems

Lead Software Engineer, Photon Infotech Inc — **Sep 2022 to Dec 2024**

Atlanta

- Contributed hands-on to development while leading a cross-functional engineering team
- Coordinated with product, design, QA, and operations stakeholders
- Represented release scope, timelines, and readiness in stakeholder forums
- Drove release management and SDLC improvements ensuring deliverables meet quality and schedule targets
- Delivered dynamic real-time visualization dashboards
- Implemented directional data flows for consistency
- Executed performance optimizations for long-running applications

Senior Software Engineer, Photon Interactive Pvt Ltd **Sep 2018 to Sep 2022**

Chennai

- Implemented full-stack features for e-commerce and real-time visualization products using Node.js, Express, React/Angular, GraphQL, PostgreSQL, and Redis
- Designed and maintained REST and GraphQL APIs
- Optimized database queries and data flows to improve performance and reliability
- Introduced automated testing and CI practices to improve deployment consistency and reduce incidents
- Collaborated with product and design to deliver responsive dashboards and reusable front-end components across platforms
- Mentored junior developers and led technical design reviews to raise code quality

Senior Software Engineer, TPF Software India Pvt Ltd **Jan 2017 to Sep 2018**

Chennai

- Promoted to Senior Engineer and led full-stack development using Node JS, Express, MongoDB, and PostgreSQL to deliver mission-critical solutions
- Built a real-time flight-status dashboard
- Implemented reusable Angular components that reduced front-end bundle size by 40% and improved page load times by 25%
- Led project teams integrating StrongLoop, Passport JS, and IoT systems
- Enforced testing and code-quality practices to improve maintainability and reduce incidents

Software Engineer, Ardhika Software Technologies Pvt Ltd **Sep 2014 to Dec 2016**

Chennai

- Started as a full-stack developer on MEAN-stack projects
- Delivered production features for SIPBazaar (mutual-fund investment platform) and Linga POS (online ordering with POS integration)
- Designed and implemented order customization, multi-way bill splitting, and large-data access optimizations
- Worked on R&D and utility applications
- Collaborated with cross-functional teams to ship stable, user-facing features and improve application reliability

PROJECTS

Inspire Brands(IDP)

Capgemini America Inc • Atlanta

- Inspire Brands(IDP), the parent to IDP (Inspire Digital Platform), a leading company for multi major restaurant brands like Arby's Baskin-Robbins, Buffalo Wild Wings, Dunkin', Jimmy John's, Rusty Taco, and Sonic Drive-in.
- The goal of the project is to enhance and develop the current system e-commerce IDP White Label Architecture platform and onboard the existing brands online presence to IDP (Inspire Digital Platform)

Discount/American Tires

Capgemini America Inc • Atlanta

- Implemented ecommerce and inventory features for Discount/American Tires, improving product discovery, order flow reliability, and checkout experience along with open ID integration.

UnderArmour

Photon Interactive Pvt Ltd • Chennai

- Under Armour, engages in the development, marketing, and distribution of branded performance apparel, footwear, and accessories for men, women, and youth.
- It operates through the following segments: North America, EMEA, Asia Pacific, Latin America, and Connected Fitness.
- The Connected Fitness segment offers digital fitness subscriptions, along with digital advertising through its MapMyFitness, MyFitnessPal, and Endomondo applications

VT Support

Photon Interactive Pvt Ltd • Chennai

- Creating Real Time Visualization Dashboard with charts, plots, etc., that help the Oil company to monitor the drilling dynamics.
- Providing interactive support for the visualization of the charts where the client can able to zoom in, share with others for future use.
- Enabling the user to be notified through collaboration landscape as Email / SMS / Chat, to be aware of any unusual data that need immediate attention.
- Building responsive dashboard, that can support any UI interface as Desktop / Tablet / Mobile.

Samsung Global

Photon Interactive Pvt Ltd • Chennai

- The objective of this project was to develop an e-commerce web application for Samsung where the Samsung sells their products online.
- The application allows Samsung to manage products, customers, and orders online.
- Also, with the application customers make orders and pay for the ordered products.
- In addition, the web store offers customers and visitors to the site an opportunity to subscribe to an email list to get news about new products and special offers.

Rapid Turnaround

TPF Software India Pvt Ltd • Chennai

- Rapid Turnaround facilitates airport duty managers to have a 360-degree view of ramp of operations and FSC users to have a bird's-eye view of network wide operations with the capability to zoom in at a microscopic level.
- It helps airlines to improve efficiency in airport ground operations by transforming the flight turnaround process into a transparent and measurable process by empowering employees

Insteract

TPF Software India Pvt Ltd • Bengaluru

- Insteract's unique profiling algorithm evaluates each available option through numerous travel parameters that match with behavior of traveler with company policy.
- We do a fair market search before we present our top options.
- All options are benchmarked with the lowest logical market fare, so you get a clear picture of what you are buying.
- Centralize your travel management, set business preferences, manage users and connect teams across the company with few clicks.

Linga POS

Ardhika Software Technologies • Chennai

- It helps restaurant owners can configure their store(s) and publish menus for online ordering.
- Restaurant owners can link the menu items configured in the restaurant POS system, take the orders and deliver.
- The online orders are pushed to the POS system as normal orders and gets printed in the kitchen for preparation and delivery.

EDUCATION

B.E. in Computer Science Engineering India

Anna University

Concentrated coursework in algorithms, data structures, operating systems, database systems, computer networks, and software engineering with strong programming and system design foundations.

LANGUAGES

English,Tamil

</> TECHNICAL PROFICIENCIES

Frontend:	React, Angular, Vue, Next JS, Svelte, OpenAPI, Contentful, AEM, Redux, NgRx, Vuex, SvelteKit, SCSS, SASS, Stencil, Solid JS, HTML5, CSS3, GraphQL
Backend:	Node JS, Express JS, Nest JS, GoLang, Spring Boot, GraphQL, Web Socket, Micro Services, FastAPI, Python
Database:	MongoDB, PostgreSQL, SQL, MySQL, Redis, ORM
CMS:	Contentful, AEM
Agentic AI:	GitHub Copilot, GitLab Duo, Elliot, Rovo
Cloud Tech:	Azure, AWS, Cloudflare, CI/CD, GitLab, GitHub, BitBucket, Docker, Deployment
Protocol:	HTTP, REST, OAUTH2, OpenID, GraphQL, JWT
Mobile:	React Native, SwiftUI
Tools & Development Practices:	Agile/Scrum, SDLC, JIRA/Confluence, Swagger, Open API
